Cover Letter

July 2026

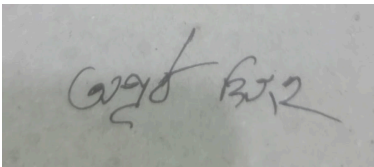

Dear Sir,

On behalf of **GOTIHUB**, we sincerely appreciate the opportunity to submit this proposal for the development of your Corporate Website.

Our objective is to design and develop a modern, secure and scalable corporate website that strengthens SIBL SECURITIES LIMITED.'s digital presence while providing an intuitive content management experience.

The proposed solution will improve investor communication, corporate branding, information accessibility and long-term maintainability.

We look forward to becoming your trusted technology partner.

Apurba Narayan Singh

01

Business First

Requirements are translated into practical workflows that support real operational goals.

02

Reliable Delivery

Delivery is organized around clear milestones, feedback cycles and accountable handover.

03

Maintainable Systems

The platform is structured for future enhancement, security updates and team adoption.

Requirements Overview

SIBL SECURITIES LIMITED. requires a modern corporate website that strengthens its digital presence, improves investor communication and keeps important brokerage information accessible across devices.

Business Goals

- Strengthen the corporate brand with a credible digital presence.
- Improve investor communication through clear website content.
- Publish research reports, publications, news and circulars.
- Improve accessibility for clients, investors and visitors.
- Deliver a responsive mobile experience for all major devices.
- Enable easy CMS updates by authorized website administrators.
- Improve search visibility through SEO optimization.

Delivery Principles

- Responsive design for desktop, tablet and mobile visitors.
- Performance-focused implementation for fast page loading.
- Security-conscious CMS configuration and access control.
- Accessible page structure for readable, user-friendly content.
- Modern CMS experience for routine content maintenance.
- Future scalability for additional brokerage website sections.

Corporate Website

The website will provide a professional public-facing identity for SIBL SECURITIES LIMITED., designed around brokerage services, investor information, publications and client communication.

01

Corporate Pages

Home, About Company, Board of Directors and Management Team pages.

02

Products & Services

BO Account, Trading Services, Research and Merchant Banking information.

03

Information Portal

News, circulars, downloads, publications and important investor resources.

04

Contact

Contact information, branch locations, Google Maps and inquiry form.

Content Management System

The CMS will help authorized website administrators manage regular updates, publications and media without depending on code-level changes.

MODULE	INCLUDED CAPABILITY
News Management	Create, update and publish company news and announcements.
Publications Management	Manage research reports, market updates and other downloadable publications.
Banner Management	Update homepage banners and key promotional website content.
Downloads	Upload and organize forms, documents, circulars and client resources.
User Management	Manage authorized CMS users and content publishing access.
Media Library	Store and reuse images, documents and website media assets.
Homepage Editor	Update selected homepage sections for timely investor communication.

Website Features

The proposed website will combine a professional brokerage-facing interface with practical features for investor communication, document access and ongoing content management.

01

Responsive Design

Optimized browsing experience across desktop, tablet and mobile devices.

02

SEO Ready

Search-friendly page structure, metadata and content organization.

03

Secure CMS

Protected administrative access for authorized website administrators.

04

Document Downloads

Structured access to forms, circulars, documents and investor resources.

05

Research Publications

Dedicated publishing section for market research and publications.

06

Branch Locator

Branch information with map-ready location presentation.

07

Contact Forms

Inquiry forms for visitor communication and service requests.

08

Performance Optimization

Optimized front-end delivery for faster loading and better usability.

Technology & Quality Standards

The solution will be implemented using modern, maintainable web technologies selected for reliability, security, performance and long-term website maintainability.

Technical Standards

- ✓ Responsive and accessible front-end implementation.
- ✓ Secure CMS architecture for website administrators.
- ✓ Structured content database for pages, media, downloads and publications.
- ✓ SEO optimization for corporate pages and published content.
- ✓ SSL-ready deployment with security-conscious configuration.
- ✓ Performance optimization for fast page loading.

Handover Package

- ✓ Production website deployment.
- ✓ CMS access credentials for authorized representatives.
- ✓ Source code and essential setup documentation.
- ✓ Training or walkthrough session after delivery.

Timeline

Estimated delivery duration: **15 Working Days** from requirement confirmation, content availability and formal approval to proceed.

PHASE 01

Discovery & Planning

Requirement confirmation, content review, website structure planning and implementation schedule.

PHASE 02

Design & Development

Website UI development, responsive front-end implementation, CMS development and content module setup.

PHASE 03

Review & Refinement

Client feedback, content correction, browser testing and launch preparation.

PHASE 04

Deployment & Handover

Production deployment, final verification, CMS walkthrough and handover materials.

Commercial Investment

The proposed fixed investment for the complete corporate website development and deployment is shown below.

DESCRIPTION	AMOUNT
Corporate website UI/UX design	Included
Responsive website development	Included
CMS / Content Management	Included
Company profile & management pages	Included
Products & services pages	Included
News & announcements module	Included
Research & publications section	Included
Downloads / Forms & Documents	Included
Career / Recruitment page	Included
Contact & branch locations	Included
SEO optimization	Included
Security hardening & SSL configuration	Included
Deployment & production setup	Included
Administrator training	Included
One-year technical support	Included
Total Project Investment	70,000 BDT

Commercial Notes

- ✓ Fixed-price implementation.
- ✓ One year technical support included.
- ✓ No hidden charges.
- ✓ Domain and hosting excluded unless separately specified.

Support, Assumptions & Validity

Post-Launch Support

- Basic bug fixing support after handover for issues within the agreed website scope.
- Operational guidance for website administrators during the initial adoption period.
- Future feature enhancement available through separate quotation.

Client Responsibilities

- Provide company content, images, branding materials and approval feedback on time.
- Provide hosting or server access if deployment is required on client infrastructure.
- Nominate responsible reviewers for acceptance and CMS handover.

Proposal Validity

This proposal is prepared for SIBL SECURITIES LIMITED. and remains valid for 30 days from July 2026 unless otherwise extended by GOTIHUB.

THANK YOU

**We look forward to working
with SIBL SECURITIES
LIMITED..**
